Contents

- 1) What is traceability?
- 2) Why is traceability important?
- 3) National and State investment in traceability
- 4) How to get involved
 - Agriculture Victoria's SmartFarm Research on traceability

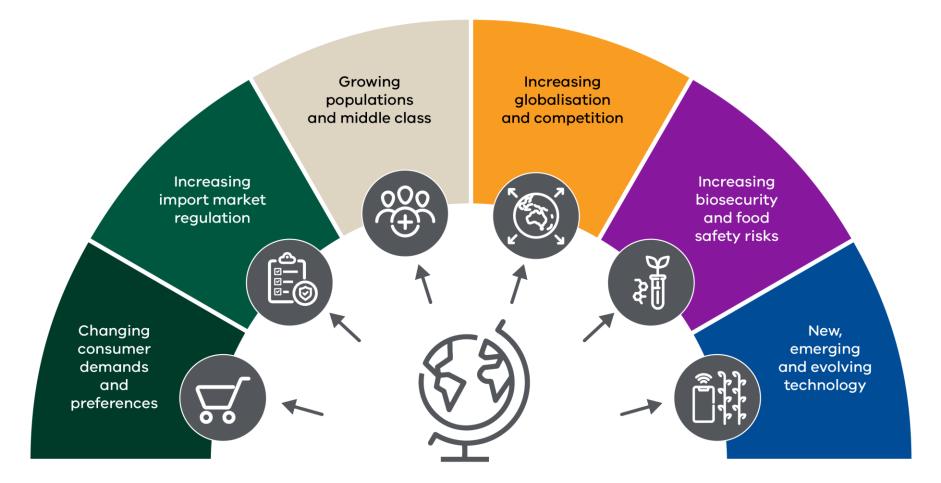

What is traceability?

The ability to **share information** about, and **follow the movement** of, **a product** through **all or part** of its supply chain.

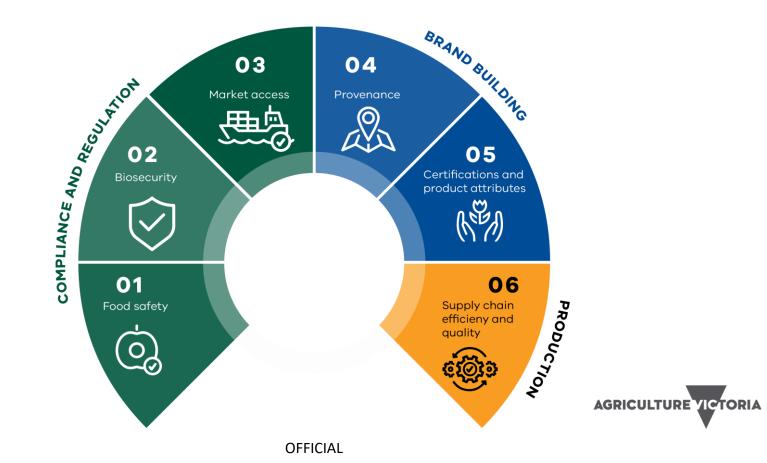

Global trends and drivers for traceability

AGRICULTURE VICTORIA

Why is traceability important?

An effective traceability system can **confirm compliance**, **support a brand** and **improve productivity**.

How does Victoria's supply chain traceability performance compare globally?

Summary of findings for horticulture

Move from paper to digital

Improve awareness of the benefits

Some competitors are moving quicker to digital

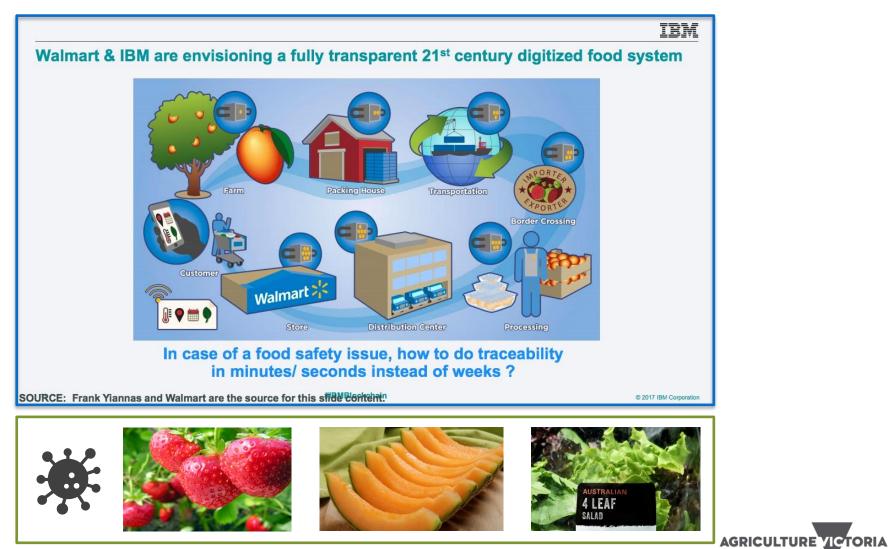

Collaboration is needed to enable change

TRACEABILITY

Cover your business

Recent Government investment in traceability

Commonwealth Government: \$68.4 million

- Export trade program
- National traceability strategy
- Globally connected export assurances.

• Victorian Government: \$15 million

- Education and tools
- Improving government systems
- Pilot projects, research and SmartFarms.

TRACEABILITY

Traceability research – Fruit Growers Victoria

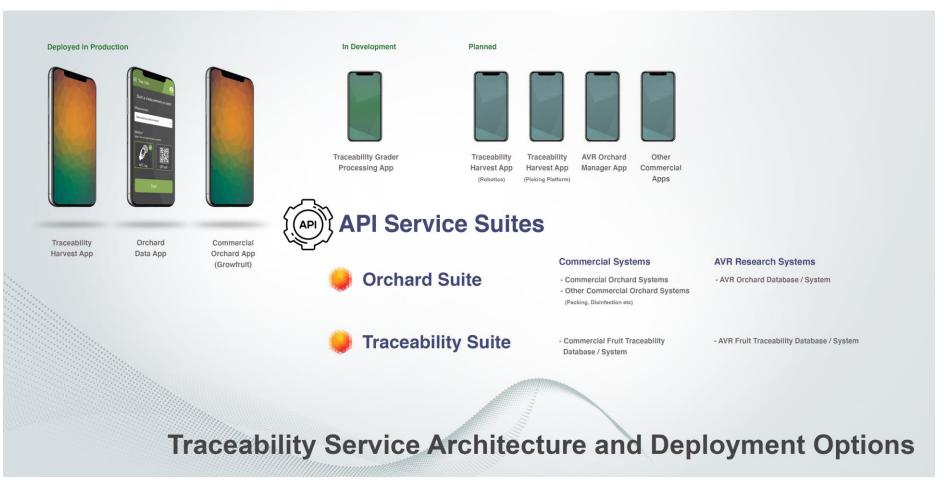

Objectives:

- Fruit traceability identify traceability harvest technologies and data exchange standards to pilot and prototype with apple and pear growers
- Orchard system traceability targeted use cases with partners to fast-track new measurement and harvesting technologies, supporting orchard traceability
- **Technology integration traceability** deploy systems capable of integrating with existing or new farm management software and hardware systems.

Traceability – orchard and harvest applications

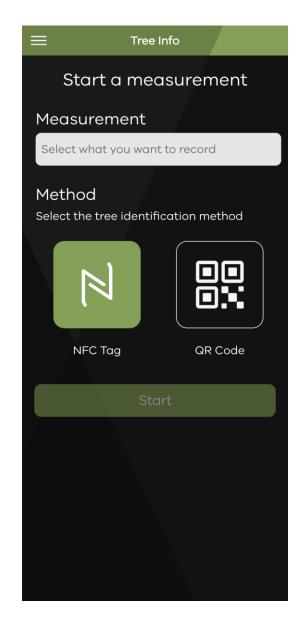

Trial farms and integration opportunities

- Practical solutions that start in the orchard full product traceability.
- Looking to partner with commercial farms and service providers to explore service integration.
- Tatura SmartFarm has demonstrator service and connected research opportunities – fruit quality sensing.
- Lets talk!

Thanks
